

FlexVeneer

Flexible Wood Wallcovering

FlexVeneer is the definitive solution for commercial and residential interiors, combining the beauty and versatility of real wood with outstanding performance and convenient installation.

Customer's benefits:

“AA” Architectural Grade Veneer

- Suitable for all residential and commercial interiors, hospitality, retail, financial and yacht interiors

More cost effective than architectural Plywood

- Easy installation on drywall, similar to vinyl wallcovering
- Large number of sequenced sheets in each flitch
- Factory-trimmed edges for accurate joints and end-matching

Unique patented Five-Ply construction

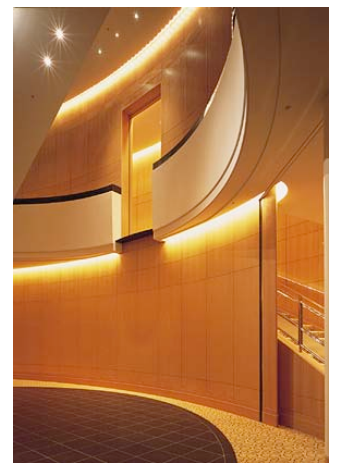

- Choice of pre-finished or ready-to-finish
- Custom stains and finishes
- Available in size 92cm x 244cm, 92cm x 274cm and 92cm x 304cm by special order

Special and Exotic wood species

- Large variety of real wood species
- Book-matched and sequence-matched standard
- Additional cuts and matching by request

Also available with technically enhanced wood veneer

- Continually available fiddleback figure
- Consistent figure and matching
